WHAT IS XAMPRO?

XamPro is designed to meet the unique needs of schools, helping you manage **students requiring a device during exams efficiently and securely.** Compatible with ChromeOS, Windows, Mac & iOS, XamPro offers a versatile solution for modern educational environments that will save you time & money.

KEY FEATURES →

Easily create on-the-fly exam sittings, print access codes, and export completed exams via the Exam's Officer standalone workstation.

Invigilate exam sittings in real-time. Pause, review, and send messages to candidates effortlessly & monitor exam progress at a click of a button.

Integrate with your School's MIS (e.g., SIMS) to pull through student data automatically to create exam sittings with ease.

Post upcoming exams, announcements, and more. Easily embed these on your school's website to create an exam bulletin board for students.

There is no requirement to utilise USB memory sticks for transferring candidates' exam data as all examination information is securely stored on our platform.

Built-in tools support students with learning needs and visual impairments, reducing anxiety for those with access requirements.
